

Manus, here is the official Turbo Response Web Architecture you are responsible for building and stabilizing. This replaces all unclear past references. Build ONLY what is listed. No assumptions. No extras.

=====

PUBLIC WEBSITE (CLIENT-FACING)

=====

1. Home Page (/)

- Hero section, features, services, benefits, CTA
- Chat with Turbo AI button
- Clean, modern layout

2. Intake Page (/intake)

Fields:

- full_name
- email
- phone
- address
- category (consumer, debt, eviction, IRS)
- case_details
- amount
- deadline
- file uploads
- Save to DB
- Redirect to confirmation page

3. Confirmation Page (/consumer/confirmation)

- Shows case ID
- Clean thank you message
- No pricing

4. Contact Page (/contact) [simple optional]

=====

ADMIN SYSTEM (STAFF ONLY)

=====

5. Admin Login (/admin/login)

- Email + password
- Issue secure token

6. Admin Dashboard (/admin)

Display:

- case_number
- full_name
- email
- category
- status
- created_at
- "View Case" buttons
- Fully mobile responsive

7. Admin Case Detail Page (/admin/case/:id)

Sections:

- Case Information
- Client Information
- Issue Details
- Uploaded Documents
- Status dropdown (5 statuses)
- Update button

MUST load correctly on iPhone

8. Analytics Dashboard (/admin/analytics)

Charts:

- Total cases
- Cases by category
- Cases by status
- Monthly trends
- Activity timeline

=====

AUTOMATION LAYERS

=====

- 9. New case admin email alert
- 10. Client confirmation email
- 11. Status change email
- 12. Document/letter autofill engine (future)
- 13. PDF export (future)

=====

PAYMENT SYSTEM (PHASE 5)

=====

14. Payments/Memberships page (/pricing or /membership)

=====

INSTRUCTIONS

=====

You must:

- Build pages EXACTLY as listed
- Fix ALL mobile responsiveness issues
- Ensure admin case detail loads all fields
- Ensure API mapping is correct
- Make system stable, fast, clean

After EACH section you MUST report back with:

- Screenshots
- Logs
- Verification notes

Do NOT proceed to next section until approval.

Begin with: ADMIN CASE DETAIL PAGE repair + mobile responsiveness.
